 - Office: Bossone 702

Course Objectives

1. Ability to apply a mathematical description to an engineering problem
2. Ability to decompose a problem into components that can be formulated with known physical/mathematical/biological models
3. Ability to use computers and computer software for analyzing and solving problems
4. Understanding of the concept of intellectual property and ability to acknowledge the work of others in a consistent manner according to accepted standards

Grading

- *Homework Assignments / Labs: 50%*
- *Midterm: 20%*
- *Final: 20%*
- *Attendance: 10%*
 - Waived if the rest of your grade is at least 90%
 - ~~“Lab” attendance waived if you have completed all of your assignments for that week.~~

Resources

- Textbook:
 - Matlab: A Practical Introduction to Programming and Problem Solving, Third Edition
by Stormy Attaway, Butterworth-Heinemann 2013.
